### **REASONS FOR ALLOWANCE**

Claims 21-31 are allowed.

The following is an examiner's statement of reasons for allowance:

As per amended independent claim 21, the Examiner finds the Applicant's arguments in the reply filed 3/29/2004 to be persuasive that the claim limitations as now amended are not taught or suggested by the prior art. Specifically, directly overriding a shift signal generated in the transmission control with the electronic command signal generated by the driver's voice command to obtain a new shift signal and executing the transmission shift solely according to the new shift signal which is appropriate for the driving situation, is not disclosed or reasonably suggested in combination by the teaching of the prior art.

Claims 22-29 serve to further define the invention of claim 21 over the prior art.

As per amended independent claim 30, the Examiner finds the Applicant's arguments in the reply filed 3/29/2004 to be persuasive that the claim limitations as now amended are not taught or suggested by the prior art. Specifically, before executing a transmission shift, always modifying shifting signals calculated by the transmission control according to the control signals formed from the driver's voice commands to form a shift command for the transmission appropriate to the situation is not disclosed or reasonably suggested in combination by the teaching of the prior art.

Newly added independent claim 31, the Examiner finds the Applicant's arguments in the reply filed 3/29/2004 to be persuasive that the claim limitations are not taught or suggested by the prior art. Specifically, similar to independent claims 21 and

30 above, the prior art does not disclose or reasonably suggest in combination the method of overriding the shifting of transmission using the driver's voice including always overriding the shift signal generated in the transmission control by the electronic command signal generated by the driver's voice command regardless of the shift signal generated in the transmission control to obtain a new shift signal and shifting the transmission based solely upon the new shift signal generated from the driver's voice command as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric M Gibson whose telephone number is (703) 306-4545. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black can be reached on (703) 305-8233. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
